HEALTHCARE CROWN ACADEMY · 26 OCTOBER 2026

Action plan

What has already been fixed for you, the short list of things only you can do, and copy-paste prompts for everything else. **Update 26 Oct 2026: the fixes and the new prices are now live** on healthcarecrownacademy.co.uk, the four app sites and Evinca, with your approval. The database prices and security changes have been applied.

12	11	7
findings fixed and live	need a decision or access from you	left for later fix prompts
plus 3 partly fixed, 5 prepared		1 finding withdrawn after re-test

Start here: Part 1 gives the 12 steps in order, with time estimates. Most take under five minutes.

Source files: `audit/2026-10-25/` on branch `claude/dazzling-noether-vpexec` of the NCLEXRN repository: AUDIT-REPORT.md, findings-register.csv (with a status column), PRICING-STRATEGY.md, CERTIFICATES-AUDIT.md, PROMPTS.md, coverage-inventory.csv, market-price-scan.csv, clinical-content-sample.csv.

Part 1 — Your steps, in order

Tick each box as you go. For anything that needs an answer, the matching form in Part 3 is ready to copy, fill in and send to Claude.

☐ 1. Glance at the live site (5 min) live

Open **healthcarecrownacademy.co.uk/#pricing**. New prices: Crown Pass £5.99 a month or £39.99 a year; MedLex and Carecraft £2.99 or £19.99; Lumen £4.99 or £34.99; Serein free for everyone. Tell Claude if anything looks wrong. Rollback takes one click in Vercel (Deployments → previous production → Promote).

☐ 2. Check two web addresses on your phone (2 min)

Open **snle.healthcarecrownacademy.co.uk** and **lss.healthcarecrownacademy.co.uk**. Tell Claude whether each opens (**Form A2**). If one doesn't, Claude switches it off everywhere with one setting.

☐ 3. Send one test email (2 min)

From a personal address, email **hello@healthcarecrownacademy.co.uk**. If it doesn't arrive, set up forwarding in Porkbun → Email Forwarding. Customers, refunds and security reports all use this address.

☐ 4. Turn on one Supabase setting (1 min)

Supabase → project **evinca** → Authentication → password settings → enable **Leaked password protection**.

☐ 5. Two Vercel settings (5 min)

(a) Upgrade team **themicrolaunchequation-lang's projects** to **Pro** before you take any payment (Hobby is non-commercial only). (b) Project **evinca** → Settings → Functions → region **London (lhr1)**, next to your database. Both settings take effect on the next deployment.

☐ 6. Tell Claude which AI service Lumen uses (5 min)

Lumen's "Academy AI" sends learners' text through your server to an AI provider. The privacy notice wrongly says it doesn't. Fill in **Form A6** (provider, region, how long answers are kept) so Claude can write the correct privacy text and the in-app notice.

☐ 7. Decide on prices (15 min)

Read section 3 of PRICING-STRATEGY.md (summary in Part 2 below) and fill in **Form A4**. Claude then puts one price list everywhere: home page, pop-up, checkout. Today these disagree.

☐ 8. Decide on certificates (10 min)

No app certificate exists yet. Choose: build them before launch, or keep "coming soon". Name who signs them (**Form A5**).

☐ 9. Book a qualified clinical reviewer (owner task)

Give them `apps/snle/reports/scoring-check.csv` (APGAR error Q0331: the answer should be 8, not 9), `units-check.csv` and `item-cues.json`. Keep Gulf Nursing free and marked "preview" until they sign off (**Form A3**).

☐ 10. Solicitor review (owner task)

Terms, refunds and privacy pages should also cover Gulf Nursing and the LSS Toolkit. New UK subscription rules are expected from 1 January 2027 (**Form A6**).

☐ 11. Database changes applied

`evinca/db/proposed/2026-10-26-audit-hardening.sql` tightens two functions, blocks one admin function for visitors, and validates newsletter emails. Applied on 26 Oct 2026, and the security advisor was re-checked. Nothing for you to do.

☐ 12. Optional: let Claude test the live site (5 min)

Add **healthcarecrownacademy.co.uk** and ***.healthcarecrownacademy.co.uk** to this environment's allowed domains, and create two test accounts (**Form A1**). This lets Claude test sign-in, real speed and the live pages.

Part 2 — What Claude fixed (live since 26 Oct 2026)

Area	What changed	Finding
Home page honesty	Removed "Approved for release by the Academy owner"; Gulf Nursing marked "Preview: clinical review in progress, free"; a correct statement of where each app keeps data; FAQ refund answer matches the refunds page; certificate perks say "coming soon"	HCA-03, 16, 32, CERT-01
Prices in the pop-up	Upgrade pop-up now shows the same monthly prices as the pricing section (MedLex £6.99, Lumen £5.99)	HCA-15
Product names	"Gulf Nursing" used consistently (picker, account menu, Daily Crown, image text); app description says six apps	HCA-17, 38
App on/off switch	One setting can hide every Gulf Nursing or LSS link if its address doesn't work (currently ON)	HCA-01, 02
Serein crisis help	Opening a help/support link skips the welcome; the welcome now has "Need urgent help now?" (tested: one tap shows the crisis numbers)	HCA-19
MedLex	Missing crest on the welcome fixed; lesson library text contrast 4.38:1 → 5.3:1, small text enlarged	HCA-28, 30
Old pages	29 old MedLex lesson pages redirect to the new lesson library	HCA-27
Tidy-up	Removed two unused hosting files; README describes the real (Vercel) setup; neutral 404 wording	HCA-25, 31
Evinca demo people	13 fictional honorees: hidden from search engines, titled "Illustrative example", removed from the sitemap	HCA-14
Evinca certificate	No longer prints "two independent, blind reviews" as fixed text; demo certificates say "Illustrative example, not an award"; method line and QR use your own domain (not evinca.org); stronger SAMPLE watermark	CERT-03, 04, 05, 08
LSS certificate and tools	Seal says "COURSE COMPLETED", not "OFFICIAL CERTIFIED"; "applied competence" wording removed; generator and badge defaults say "SPECIMEN"	CERT-09, 10 (part), 12
Question-bank checks	New read-only script `apps/snle/scripts/item-checks.mjs`: confirms the APGAR error and measures answer cues and units. No question was changed.	HCA-04, 05, 07
Database (applied)	New prices in the checkout table; Serein paid plans switched off; helper functions hardened; admin overview no longer callable by visitors; newsletter emails validated, with consent time recorded	HCA-11, 12, 15
New prices (live)	Crown Pass £5.99/£39.99; MedLex and Carecraft £2.99/£19.99; Lumen £4.99/£34.99; Serein free. Home cards, interest picker, upgrade pop-up, search-engine data and refunds page all match the database.	Pricing strategy

Checks run: Serein and MedLex rebuilt from source; a clean rebuild was byte-identical before any edit. Regression crawl of 30 pages found 0 accessibility violations and no new errors. Evinca production build plus 117 automated assertions pass. Withdrawn: HCA-20. A re-test showed MedLex already skips its welcome on direct links. **Heads-up:** other branches (e.g. `claude/gulf-`

`crosswalk`) also change the Gulf studio; merging may need a short conflict check on `site/home.html`.

Pricing (applied 26 Oct; remaining options for step 7)

Product	Now	Recommended
Crown Pass	£9.99/mo, £69.99/yr (checkout database says £79.99)	**£5.99/mo, £39.99/yr**; founding members £29.99 first year (with a real end date)
MedLex	£6.99/mo	£2.99/mo, £19.99/yr, or £29.99 lifetime
Lumen	£5.99/mo	£4.99/mo, £34.99/yr (covers AI cost)
Carecraft	£4.99/mo	£2.99/mo, £19.99/yr
Serein	£4.99/mo	Free for everyone
Gulf exams	Saudi free; others unpriced	Free until clinically reviewed; then USD 39 for 3 months, or USD 79 for all four exams for a year
Evinca	USD 19–499	USD 9–299 (e.g. individual $149 → $79)
LSS Toolkit	USD 99/yr	Keep USD 99
Regional	—	About 40% off for middle-income and 60% off for lower-income countries

Part 3 — Forms: copy, fill in the [brackets], send to Claude

A1. Live testing access (step 12)

```
Access for the live audit:
1. I added healthcarecrownacademy.co.uk and *.healthcarecrownacademy.co.uk to this
environment's allowed domains: [done / not done]
2. Test accounts (testing only, no real people):
   - Free account email: [test-free@...]
   - Crown Pass test account (admin-granted, no payment): [test-crown@...]
   - Test inbox I control for verification emails: [address]
3. You may sign in, sign out and trigger password recovery for these test accounts only:
[yes/no]
4. Google Search Console access or exported reports: [attached / not available]
```

A2. Addresses and hosting (steps 2, 3, 5)

```
Hosting facts:
- snle.healthcarecrownacademy.co.uk opens on my phone: [yes / no]   It is hosted on: [not set
up / Cloudflare Pages / other]
- lss.healthcarecrownacademy.co.uk opens: [yes / no]   Operated by: [Healthcare Crown Academy
Ltd / Health Quality Leaders Ltd / other]
- I own evinca.org: [yes / no / don't know]
- Test email to hello@healthcarecrownacademy.co.uk: [arrived / did not arrive]
- Vercel plan: [Hobby / Pro]     Evinca region set to London: [yes / no]
- Old Vercel projects nexusrn-public-beta / nexusrn-public-preview: [delete / keep / unsure]
```

A3. Clinical review (step 9)

```
Clinical review:
- Reviewer name, profession, registration body and number: [___]
- Scope: [UK nursing / Saudi SNLE / UAE DHA-DOH / Qatar DHP]
- Q0331 (APGAR) should be corrected to 8: [yes / reviewer to confirm]
- Glucose units: [show both mg/dL and mmol/L / per exam: ___]
- Verified crisis numbers for Serein, with a source link each: Saudi Arabia [___], UAE [___],
Qatar [___], others [___]
- Until review: [keep Gulf Nursing as "Preview, free" / hide it]
```

A4. Prices (step 7)

```
Pricing decisions:
- Recommended UK price list (PRICING-STRATEGY.md section 3.1): [approve all / changes: ___]
- Serein fully free: [yes / no, keep at £___]
- MedLex lifetime £29.99: [yes / no]
- Gulf exams after review: [USD 39 / 3 months and 59 / 12 months per exam | Gulf Exam Pass USD
79 | included in Crown Pass]
- Regional prices (bands A/B/C): [yes / no]; currencies: [GBP, USD, SAR, AED, EGP, INR, PHP
...]
- Founding-member offer: price [£29.99 first year], end date [__], who qualifies [people who
reserved]
- Evinca fees (section 3.3): [approve / changes: ___]
- VAT registered: [yes/no]; Stripe fee rate: [__% + __p]; AI cost per Lumen user per month:
[£__ / unknown]
```

A5. Certificates (step 8)

```
Certificates:
- App certificates: [build before paid launch / keep "coming soon"]
- Crown Suite signatory: name [___], title [___], signature image [attached, with consent] or
"sign as the company"
- Evinca signatory: [named Chair ___ with consent / sign as the company until a board exists]
- Rules: MedLex = 40-question final test at 80%+; Carecraft = 10 lessons + 20-question test at
80%+;
  Serein = 7-day journey (participation); Lumen = [no certificate / ___]   [approve / edit]
- LSS certificate issuer: [Health Quality Leaders Ltd / Healthcare Crown Academy Ltd]; verify
web address: [___]
- "Hossam AlDhaher, LSSMBB" in Carecraft: awarding body [___] or [remove the letters]
```

A6. Legal and AI processor (steps 6, 10)

```
Legal:
- Lumen Academy AI provider: [OpenAI / Anthropic / Google / other], region [___], contract
(DPA) signed [yes/no],
  keep cached answers for [__ days]
- Solicitor reviewing terms, refunds and subscription rules: [name / not yet]
- Terms should cover: [Gulf Nursing, LSS Toolkit, Evinca]; LSS terms are [ours / theirs at ___]
```

A7. Approval to publish (step 1)

```
Approved to publish. Merge claude/dazzling-noether-vpexec (site fixes, not the audit folder if
you prefer)
into claude/loving-ptolemy-srrq02, and claude/audit-safe-fixes into evinca main.
I checked both preview links. [Any change requests: ___]
```

Part 4 — Fix prompts for the remaining work

Paste one prompt per Claude Code session, in this order. Every prompt works on a separate branch and never publishes without your approval. Prompts marked mostly done now only cover what is left.

B1. Containment mostly done: switch off dead apps

```
Repo themicrolaunchequation-lang/NCLEXRN. My answers to Form A2 are: [paste].
In site/assets/js/crown-account.js set LIVE.snle / LIVE.lss to false for any address that does not work.
Bump VERSION in site/sw.js. Test with the Playwright harness that no link to a switched-off app is visible
on the home page, the app menus, the account menu or the Daily Crown. Push to a branch and give me the preview link.
```

B2. Lumen privacy notice and AI notice needs Form A6

```
Repo NCLEXRN, new branch from claude/loving-ptolemy-srrq02. Read audit/2026-10-25/AUDIT-REPORT.md HCA-08.
My Form A6 answers: [paste].
1. site/privacy.html: add "Lumen Academy AI" (text goes from the browser to our Supabase function lumen-ai, then to
   [provider] in [region]; purpose; lawful basis; lumen_ai_cache kept [N] days; transfers; how to opt out).
   Correct the sentence that says AI text never passes through our servers. Update "Last updated".
2. Lumen (apps/lumen, rebuild with build-web.mjs): one-time notice before the first Academy AI call, including
   "Do not include patient-identifiable information", with "Use Academy AI" / "Use my own key instead".
3. Draft (do not apply) a purge job for lumen_ai_cache older than [N] days in evinca/db/proposed/.
Run apps/tools/lumen-check.mjs, screenshot at 390px and 1366px, push branch only.
```

B3. Evinca trust mostly done: signatory

```
Repo evinca, branch from claude/audit-safe-fixes. My Form A5 answer for the Evinca signatory: [paste].
Update the certificate signature block in app/[locale]/verify/[id]/certificate/page.tsx and components/issuance-kit.tsx
to the named signatory (or "For Healthcare Crown Academy Ltd"), version the rubric as "2026.1" with a link to /how-we-review,
and add a test that fails if "evinca.org" or a fixed "two independent, blind reviews" string reappears.
Run pnpm build and pnpm test:review. Push branch only.
```

B4. One price list everywhere needs Form A4

```
Repos NCLEXRN and evinca, new branches. My approved prices (Form A4): [paste].
1. Write (do not apply) a migration in evinca/db/proposed/ setting public.crown_plans to these
prices, adding one-off
   Gulf exam products and regional band prices (band A/B/C, currency, amount).
2. Generate site/assets/data/prices.json from the same values; home pricing, the paywall
(crown-account.js PRICE) and the
   JSON-LD offers must all read it. Remove hard-coded prices.
3. Founding-member offer shown only before [end date], with the date visible; no struck-through
prices unless charged before.
4. If Serein is free: remove it from paid plans and paywall gating.
5. Test: every plan's price is identical in home, paywall, prices.json and the migration.
Screenshots with ?gates=on.
Push branches only; list the migration for me to approve.
```

B5. Question-bank corrections needs Form A3

```
Repo NCLEXRN, apps/snle. My reviewer's decisions: [paste]. Do NOT edit source/original.html.gz.
Add src/corrections.json (id, field, old, new, reason, reviewer, date) applied at build time in
build.mjs.
Apply the reviewer-approved changes (starting with Q0331 -> D/8). Fix the punctuation cue
(consistent final full stops)
as a formatting-only correction. Add glucose unit conversions per my policy. Re-run
scripts/item-checks.mjs
(target: 0 APGAR mismatches, 0 punctuation cues) and the apps/snle tests. Push branch only.
```

B6. International crisis numbers needs Form A3

```
Repo NCLEXRN, apps/serein. My verified numbers with sources: [paste].
Add a country selector to Serein's Get help (default from browser language/time zone, user can
change) showing these
numbers with source link and "checked [date]"; keep the UK list unchanged. Rebuild with build-
web.mjs; run
apps/tools/serein-check.mjs and a clean-profile test of /#support. Push branch only.
```

B7. Security hardening needs your approval

```
Repos evinca and NCLEXRN, new branches. Read AUDIT-REPORT.md HCA-09 and HCA-13. Do not change
live settings.
1. Pull a read-only baseline of the live schema into evinca/supabase/migrations (I will provide
database access).
2. Newsletter double opt-in: pending status + confirmation token + Edge Function to send the
email (draft, not deployed).
3. Session hardening behind a flag: HttpOnly, host-only refresh cookie on the account site;
short-lived access tokens
   to our own subdomains via an allowlist; crown-account.js and lib/auth.ts use it when the
flag is on.
4. Lumen: self-host the scripts loaded from cdn.jsdelivr.net / esm.run and remove them from
vercel.json CSP.
Run builds and tests; push branches; list every step awaiting my approval.
```

B8. Build real certificates needs Form A5

```
Repos evinca and NCLEXRN, branch feat/certificates. My Form A5 answers: [paste].
Server-side certificates only: crown_assessments + crown_submit_assessment(app, answers)
scoring in the database,
3 attempts a day, then crown_issue_certificate with serials MLX-/CCR-/SRN-YYYY-NNNNNN (allow
lumen if approved).
Account site: /account/certificates (list, PDF) and public /verify/c/[serial]; QR always points
to that page.
Wording: "Certificate of Completion" / "Certificate of Participation" + "Self-paced educational
completion. Not a licence,
accreditation, CPD credit or assessment of clinical competence." Admin revoke/reissue with
audit rows.
LSS: QR -> https://[verify domain]/verify/ backed by a lookup. End-to-end test: fail ->
none; pass -> Active;
revoke -> Revoked. Migrations prepared, not applied. Change pricing perks from "coming
soon" only after this passes.
```

B9. Speed and search any time

```
Repos NCLEXRN and evinca, branch fix/perf-seo.
1. MedLex: reserve space for late content (CLS < 0.1 at 390x844), lazy-load infographics, defer
non-visible routes.
2. Lumen: move inline bundles out of site/lumen/index.html (target < 50 KB) via
apps/lumen/build-web.mjs; add og:image.
3. Add MedLex Canvas lessons to the sitemap with self-canonicals and meta descriptions; 308 app
paths requested on the
   wrong host to the right host in site/vercel.json.
Measure before/after with the Playwright lab script and paste the table. Push branch only.
```

B10. Accessibility polish any time

```
Repo NCLEXRN, branch fix/a11y. MedLex Today: exactly one visible h1 per route. Run axe-core
(WCAG 2.2 AA)
on home, every MedLex route, the Canvas library and 5 lessons, Carecraft, Serein and Lumen;
report 0 violations
or list what remains. Push branch only.
```

B11. Legal pages draft needs Form A6

```
Repo NCLEXRN, branch fix/legal-draft. My Form A6 answers: [paste]. Draft additions to
site/terms.html,
privacy.html and refunds.html covering Gulf Nursing, the LSS Toolkit (or a link to its
operator's documents), and
subscription renewal reminders and easy cancellation in line with the UK rules expected from 1
January 2027.
Mark "for solicitor review"; do not publish.
```

B12. Privacy-friendly visitor counts needs your approval

```
Repos NCLEXRN and evinca, branch feat/analytics. Cookieless, aggregate counts only (no user
IDs, no IPs):
one table (event, app, day, count) plus an Edge Function. Events: landing_view, app_open,
signup_start, signup_done,
learning_start, lesson_complete, js_error. Small chart in account admin. Draft a privacy-notice
paragraph and DPIA
note for my review. Push branch only.
```

Part 5 — Files

File (audit/2026-10-25/)	What it is
ACTION-PLAN.pdf	This document
AUDIT-REPORT.md	Full audit: scores, journeys, 39 findings, clinical review, roadmap
findings-register.csv	Every finding, with evidence, fix, acceptance test and a 26 Oct status column
PRICING-STRATEGY.md · market-price-scan.csv	Price review and 29 competitor price points with sources
CERTIFICATES-AUDIT.md	Every certificate, 14 findings, minimum standard
PROMPTS.md	Original prompt pack (Part 4 here is the updated version)
coverage-inventory.csv · clinical-content-sample.csv	What was tested, and the 28 sampled questions
apps/snle/reports/*	Question-bank check results for your clinical reviewer
evinca: db/proposed/2026-10-26-audit-hardening.sql	Database changes waiting for your yes

Prepared by Claude Code. Clinical comments are AI screening, not clinical approval. Market prices are indicative (from search summaries, 25 Oct 2026); confirm before publishing comparisons.
