HEALTHCARE CROWN ACADEMY

Social Publishing Pack

YouTube · Facebook · LinkedIn
38 videos · 7 apps · English and Arabic

Prepared 4 November 2026. Every title, description, tag set and post below is ready to copy and paste. Keyword data: vidIQ (YouTube search estimates, retrieved 4 Nov 2026).

1. How to use this pack

1. Each zip holds one platform: **HCA-YouTube**, **HCA-Facebook**, **HCA-LinkedIn**. Inside, there is one folder per app with the videos and a **COPY.txt** file containing exactly what you paste.
2. YouTube folders have **Main-16×9** (normal uploads) and **Shorts-9×16** (vertical, under 3 minutes). Facebook and LinkedIn folders hold the single best shape for that platform: vertical for videos up to 90 seconds, landscape for longer ones.
3. Every link carries a `?ref=` code (for example `?ref=copq-yt`) so you can see which platform and video brought each visitor.
4. Keep the honesty lines in every post: the Gulf disclaimer, "illustrative samples" where shown, "not medical treatment" for Serein, and "Voices are AI-generated".
5. Prices and discount codes are deliberately left out (except where your other account's Gulf "Why Us" video already shows them on screen).

2. Keyword research (YouTube)

Volume and competition are vidIQ scores from 0 to 100. Lower competition is easier to rank for. Monthly searches are vidIQ estimates for YouTube only; Facebook and LinkedIn do not publish search volumes, so they rely on hashtags, the first line of text and audience targeting.

Keyword	Volume	Competition	Est. monthly searches	How we use it
lean six sigma healthcare	56	30	5,321	Lean Six Sigma titles: main keyword
six sigma	64	47	19,985 (+83%)	Lean Six Sigma tags and descriptions
green belt	58	39	7,179 (+80%)	Certificate video title, tags
operational excellence	59	27	8,673	Lean Six Sigma LinkedIn and tags
process improvement	55	44	4,549	Lean Six Sigma tags
medical terms	58	57	8,131 (+148%)	MedLex tags and first line
medical terminology made easy	54	58	4,003	MedLex title (video 1)
medical terminology	0	55	under 750	MedLex niche term (paired with broad)
SBAR	58	47	7,581	Carecraft SBAR title
effective communication	59	53	9,166	Carecraft tags
nurse burnout	57	30	6,648	Serein title/tags: low competition
burnout recovery	72	39	64,101	Serein tags and descriptions
how to recover from burnout	66	39	26,075	Serein tags
study tips	76	46	114,372	Lumen tags and hashtags
how to lock in studying	65	30	21,663	Lumen focus video: low competition
study techniques	62	42	13,782	Lumen titles/tags
take notes	66	50	27,544	Lumen reader video tags
nclex review	60	52	9,933 (+84%)	Lumen and Gulf tags
nclex	74	56	87,421 (+21%)	Gulf tags ("NCLEX alternative Gulf")
registered nurse rn	66	45	26,134	Gulf and Carecraft tags
SNLE exam	0	16	under 750	Gulf Saudi title: easy to rank
DHA exam for nurses	0	12	under 750	Gulf Dubai title: easy to rank

nursing awards	0	13	under 750	Evinca title: easy to rank

What the data says

- **Exact niche terms are tiny on YouTube**: “SNLE exam”, “DHA exam for nurses”, “SBAR nursing”, “medical terminology” and “nursing awards” each show under 750 searches a month. That is good news, because the competition is also low (12–34), so a well-titled video can rank near the top. Always pair the niche term with one broad, high-volume term in the title or first line.
- **Best opportunities (high volume, low competition)**: “lean six sigma healthcare” (5.3k, competition 30), “operational excellence” (8.7k, 27), “nurse burnout” (6.6k, 30), “burnout recovery” (64k, 39), “how to lock in studying” (21.7k, 30), “green belt” (7.2k, rising +80%), “six sigma” (20k, rising +83%), “medical terms” (8.1k, rising +148%), “nclex review” (9.9k, rising +84%).
- **Gulf**: most searchers come from the source countries (India, the Philippines, Egypt and others), so English titles that name the exam (SNLE, DHA, DOH, DHP, Prometric) reach them. Arabic titles and hashtags reach candidates already in the Gulf.

3. Platform settings: the essentials

Setting	YouTube	Facebook	LinkedIn
Title	70 characters or fewer, main keyword first, app name last	The first line of the caption is the headline (about 125 characters show)	The first 2 lines show before “see more”: put the hook there
Description / text	The first 150 characters appear in search: hook + keyword + benefit. Then the summary, link, disclaimer and 3 hashtags	Hook, one benefit line, link, disclaimer, 3–5 hashtags	Hook, 2–4 short lines, “link in first comment”, 3–5 hashtags
Links	In the description and the pinned comment	In the caption; the “Learn more” button when boosting	Put the link in the first comment: posts with links in the body get less reach
Format	Landscape main video + vertical Short (under 3 min)	Reels (vertical, up to 90 s) reach the most people	Native upload; vertical works well on mobile
Captions	Burned in; also publish the auto-captions	Burned in; turn on auto-captions	Burned in
AI disclosure	“Altered or synthetic content”: Yes (AI voices)	Label as AI-generated audio if asked	Say “Voices are AI-generated” in the text
Best times to post (starting points, then check your analytics)	Weekdays 17:00–20:00 audience local time; Shorts any day	Weekdays 12:00–15:00 and evenings 19:00–21:00	Tuesday to Thursday 08:00–10:00
Rhythm	2 main videos + 3 Shorts a week	1 Reel a day	2–3 posts a week

Four-week posting plan (suggested)

Week	Mostly Gulf, students (YouTube Shorts, Facebook Reels)	Professionals (LinkedIn, YouTube main)
Week 1	Gulf: All-in-one + SNLE (EN and AR) · MedLex: Decode any word	Lean Six Sigma: Cost of Poor Quality · Carecraft: SBAR
Week 2	Gulf: DHA and DOH (EN and AR) · Lumen: Reader (full + short)	Lean Six Sigma: Red Bead Ward · Serein: Two-minute pause
Week 3	Gulf: Qatar DHP (EN and AR), Why Us · MedLex: Build the word, Root cards	Evinca: Where do you come in, Proof page · Carecraft: Teach-back

Week 4	Gulf: Reasoning, BE-FAST, Glossary · Lumen: Recall cards, Focus	Lean Six Sigma: Certificate, Cp/Cpk, Swimlane · Serein and Evinca remaining

YouTube channel set-up

- One playlist per app (names are in each copy block). Add every Short to its app playlist too.
- Channel keywords: Healthcare Crown Academy, nursing education, medical terminology, lean six sigma healthcare, SNLE, DHA exam, nurse burnout, study tips.
- Channel trailer: Gulf Region Nursing “Why Us” for Gulf visitors, or Lumen reader for students.
- Use the Arabic videos with an Arabic title and description, and add the English version as a related video.

TITLE

Cost of Poor Quality in Healthcare: Lean Six Sigma Business Case

DESCRIPTION

What is a 4% infection rate really costing? Put a price on poor quality. In the app's CLABSI worked example, a 4% infection rate means 48 infections and $2.3M a year; bringing it to 1% frees up $1.73M. That is a business case leaders act on.

In this video:
• Quick COPQ and savings model
• Four-category cost ledger: prevention, appraisal, internal and external failure
• Learning Studio with clinical examples

TITLE

Deming's Red Bead Experiment for Nurses: Stop Ranking Staff

DESCRIPTION

Worst nurse on Monday. Best by Wednesday? The Red Bead Ward simulation shows why daily league tables mislead: six nurses draw from the same box and the “worker of the day” changes by chance. Every point sits inside the control limits, so the differences come from the system.

In this video:
• League table that reshuffles itself
• Predict, then run the simulation
• Control limits and Deming’s lesson in the Learning Studio

POST TEXT

Collected fast. Result... where?

A blood sample is collected in minutes, so where does the time go? A swimlane map shows who does what and where work waits: patient, collection, transport and laboratory, every handoff, the queue and the identifier-check loop.

▸ Roles in lanes
▸ Handoffs and queues made visible
▸ Decision loops

YouTube Short

TITLE

Somebody made care better today. Did anyone write it down? #Shorts

DESCRIPTION

Somebody made care better today. Did anyone write it down? The four ways in (tell your story, nominate a colleague, say thank you, recognise your team), then two sample cases through Evinca's free two-minute eligibility check. No account, nothing submitted, nothing scored.

▶ Try it free: https://evinca.healthcarecrownacademy.co.uk/en?ref=comein-ytshorts

Evinca recognitions are not licensure, certification or accreditation.
People, records and certificates shown are illustrative samples.
Voices are AI-generated.

TARGETING (IF SPONSORING)

Job titles: Registered Nurse, Midwife, Nurse Manager, Quality Improvement Lead, Allied Health Professional, Talent Acquisition (healthcare). Industry: Hospitals and Health Care.

Before you post: checklist

- Watch and listen to each video once (sound was not checked by ear).
- Arabic titles and posts: ask a native Arabic-speaking nurse to review them.
- Gulf exam numbers: confirm with the regulator if a post goes out after November 2026.
- Evinca: two sets exist. The short videos (about 50 s) suit Shorts and Reels; the long ones (2½–3½ min) suit YouTube main and LinkedIn. Post the short and long versions of “Where do you come in” and “Proof page” at least two weeks apart.
- Reply to comments in the first hour; pin the best question.
