Subject: Request for tax advice and written sign-off before we take payments (Healthcare Crown Academy Ltd, company 17501904)

Dear [Accountant's name],

We are a small UK company selling online learning worldwide. We have not taken any real money yet. Payments are in test mode and are **blocked in our code until our advisers have signed off**.

I would like your **advice and written sign-off** on the tax questions below, so I know what to register for, what to charge, and what records to keep **before the first live sale**. I am not an accountant, so please write in plain English.

Before you start, please send me a fixed-fee quote (or an estimate with a cap), a likely timescale, and confirmation that you have no conflict of interest. If some countries need a local adviser, please say which, and whether you can coordinate with them.

1. The company

- **HEALTHCARE CROWN ACADEMY LTD**, England and Wales, company **17501904**.
- Registered office: 71-75 Shelton Street, Covent Garden, London WC2H 9JQ. This is a **registered-office service address**. Nobody works there.
- **Not VAT-registered** anywhere.
- One director, no employees. Shareholders: [to confirm]. Financial year end: [to confirm].
- **The business is run day to day from Saudi Arabia and Jordan, where I live. Nothing is done from the UK.** How my time is split between the two countries, and where decisions are made: [to confirm; I will give you dates and details].
- Expected sales in the first 12 months, and by country: [to confirm].

2. What we sell

All online, delivered automatically, mostly to **consumers**, through **one UK Stripe account**.

Product	Price	Notes
Crown Pass (learning apps subscription)	£5.99 a month or £39.99 a year; founding first year £29.99 until 31 January 2027; regional prices US$4.49 / US$29.99 (band B, includes Jordan) and US$2.99 / US$19.99 (band C)	Renews automatically; 7-day free trial; yearly £49.99 for new members from 1 February 2027
Gulf Pass (practice for Saudi, Qatar, Dubai and Abu Dhabi nursing exams; includes the Crown Pass)	US$50 for 3 months or US$69 for 6 months	One-off; never renews. Mainly buyers in Saudi Arabia, Qatar and the UAE
Lean Six Sigma Green Belt toolkit, with a Certificate of Completion	US$99 for 12 months (US$149 from 1 February 2027)	One-off; separate website
Evinca recognition programme (from June 2027)	Application fees US$39 to US$299 (reduced from US$19); other items include an Institution plan US$2,400 a year and **printed certificates sent by post** (US$39 or US$59 plus shipping)	Reviewers are rewarded with US$5 account credit per review (no cash value)

- Customers can get a **full refund within 14 days** for any change of mind.
- Prices are shown as the total paid. The main site says **“No VAT added: the price shown is what you pay”**. The Green Belt site says we do not add UK VAT while not registered, and that any tax we must collect for the buyer’s location will be included in the total.
- In Stripe, our prices are set as **tax-inclusive**. **Stripe Tax (automatic tax calculation) is not switched on.** Stripe collects every buyer’s **billing address**.
- **Money flow:** Stripe pays out to a **Payoneer GBP receiving account in the company’s name**. I confirm a **company-name bank account** exists for withdrawals from Payoneer (bank and country: [to confirm]).

The full facts are in the attached **SIGN-OFF-FACTS** pack. Section 11 lists our current understanding of tax. **Please treat every tax statement there as unconfirmed.** It comes from our own research, not from a tax adviser.

3. Questions

A. UK VAT

1. Given the business is run from Saudi Arabia and Jordan and the UK address is only a registered-office service, is the company a **UK "non-established taxable person"** for VAT?
2. If so, must it **register for UK VAT from its first UK sale** (no threshold)? If not, how should we monitor the £90,000 threshold?
3. How is **UK VAT** applied to our digital services and e-learning sold to **UK consumers**? Are any of our products exempt or zero-rated?
4. How are sales to UK **businesses** (team seats, Evinca institution plans) treated?

B. EU VAT

5. Are our sales to **EU consumers** "electronically supplied services"?
6. Must we register for the **non-Union One Stop Shop** from the first EU sale? Or should we **block EU sales** until we are registered?

C. Gulf states and Jordan

7. **Saudi Arabia (ZATCA):** must we register for and charge VAT on electronically supplied services to Saudi consumers as a **non-resident**? Does the answer change because the business is **run from Saudi Arabia** (resident rules instead)?
8. **UAE:** do we need to register for UAE VAT for sales to UAE consumers? From what threshold?
9. **Qatar:** we understand there is **no VAT in Qatar at present** [to confirm]. Is that right, and is anything else due?
10. **Jordan:** does Jordan's **general sales tax** apply to our digital services to Jordanian consumers? Is the non-resident electronic-services route available to us, given the business is **run from Jordan**? From what threshold?
11. Any other country where we are likely to sell (for example India, the Philippines, Egypt, other Gulf states) that needs registration from the first sale? Please flag only.

D. Prices and invoices

12. Must our prices or wording change? For example: is "No VAT added: the price shown is what you pay" still correct where tax applies, and must prices **include** local tax?
13. What must appear on receipts or invoices in each country where we register?
14. Should we switch on **Stripe Tax**, and in which countries do we still need our own registrations?

E. Corporation tax and residence

15. Is there a risk that the company is **tax-resident in Saudi Arabia or Jordan** because its **central management and control** (and place of effective management) is there? How would the UK–Saudi and UK–Jordan tax treaties decide this?
16. Is there a **permanent establishment** risk in Saudi Arabia or Jordan? What filings follow (for example UK corporation tax, Saudi zakat or income tax, Jordan income tax)?
17. Is a UK company still the right structure? Please flag only, if it needs a separate piece of work.

F. Payments, bookkeeping and records

18. What records do we need from **Stripe** and **Payoneer** (payouts, fees, refunds, currency conversion) to keep proper books? How should payouts in GBP and sales in USD be recorded?
19. What **evidence of customer location** must we keep for each country (billing address, card country, IP address), and how many pieces?
20. Please confirm we must keep records for **6 years** (we plan 6 years from the end of the financial year), and whether any country requires longer.
21. What is our **filing calendar** (Companies House, HMRC and any other country)?

4. How I would like your advice set out

1. **A table by country:** registration needed now? (yes / no / threshold) · rate · how to register and pay · deadlines · action **before the first live sale**.
2. Clear answers to each question above, numbered the same way.
3. A short list of what to do before we switch on live payments, and **which countries (if any) to block** until we are registered.
4. Your **sign-off statement** (the block at the end of this letter).

Please do not assume facts. If you need dates, documents or numbers, please ask and I will reply the same day.

Thank you. I look forward to your quote.

Kind regards,

[Director’s name]
